CPYRGHT **Uncle Sucker!**

**C**ERTAINLY, anyone who has given some thought to the international situation recently must see that the Soviet attitude primarily has been based, since last spring, upon the Russian belief that the gullible Americans will swallow anything, as long as it is presented to them with a smile!

That, of course, does not speak well for the Russian view of our intelligence.

But, the facts seem to bear out this interpretation of Russian foreign policy, at the moment.

The Russians have been smiling pleasantly at us since last April. But, Mr. Allan Dulles of our Central Intelligence agency says Red espionage propaganda continues unabated in Europe and America, and no where is any perceptible lessening of Red pressure, or purpose.

In Geneva, even while smiling, M. Molotov with colossal nerve, demanded that we disband the North Atlantic Treaty organization and armed force, that we admit Red China as an observer of European affairs (supreme insult to the Allies), set Germany outside the Western sphere, and set up a new "collective security" organization with Russia as the mainstay.

Preposterous! But, those are the facts.
